Tomeet is a programme of events to analyse tomato cultivation trends in the different seasons, with visits and personalised meetings at the Rijk Zwaan Experimentation and Development Centre (CED El Ejido).

2nd Edition Tomeet® Congress: Innovating to Lead. Challenges and Solutions.

On 2 April, **Tomeet®** the leading event for the tomato sector in Southern Europe, took place at Cajamar's headquarters (PITA, Almería). Under the theme "Innovating to Lead. Challenges and Solutions", it gathered over 250 professionals to discuss key challenges in production and marketing.

With contributions from **20 experts**, the congress addressed sustainability, competitiveness, differentiation and changing consumer demands, **establishing itself as a key forum for knowledge exchange and innovation.**

CED El Ejido, value generator.

The mission of the Rijk Zwaan Experimentation and Development Centre (CED El Ejido) is to generate knowledge and develop agronomic solutions to help the agricultural industry in its technological transformation and boost its competitive advantages. The facilities are located on a 30,000 sqm site, arranged in three levels of technology.

The complex has high-, medium- and low-tech greenhouses, plus twelve cultivation modules, each with two irrigation sectors. **The main crop at the CED is the tomato.**

Rugose Defense™

High resistance to ToBRFV

Rijk Zwaan presents ground-breaking genetics with high resistance (HR) against the Tomato Brown Rugose Fruit Virus (ToBRFV). Elevate your crop strategy with our top-performing hybrid tomato varieties, now available under the Rugose Defense label.

In the coming period, Rijk Zwaan will continue to release new varieties for trials and commercial introduction through our global breeding programs.

Discover Rijk Zwaan's
Rugose Defense.

 **RIJK ZWAAN**

Rugose Defense™

Coralyta RZ Cherry

Resistant cherry tomato year-round.

Loose-harvest cherry tomato. Vigorous plant with medium-sized fruits (27-32 mm) of intense red colour. Good flavour (8.0-8.5° Brix). Recommended for both autumn-winter and spring-summer cycles.

Cherry

Rugose Defense™

Cuarzyta RZ

Cherry

Tasty and resistant cherry tomato.

Cuarzyta has very uniform fruits with a very good size, without any sensitivity to cracking. The attractive colour is linked with a good taste and high sugar content. Shelflife is good. It has a compact plant with a good yield potential. The variety is adapted to Winter long cycles in Mediterranean conditions.

Cherry

Rugose Defense™

Kemery RZ

Cherry

Yellow cherry tomato for mediterranean cultivation.

Yellow cherry variety for loose harvesting. Strong plant suitable for winter crops. Crack-resistant fruits with very good shelf life. Excellent flavour (> 9° Brix).

Cherry Plum

Rugose Defense™

Abrametto RZ

Cherry Plum

Highly productive pear cherry variety for loose harvesting. Fruits with good size that is maintained throughout the cycle. Intense red colour and good flavour.

Cherry Plum

Rugose Defense™

Laurencetto RZ

Cherry Plum

Pear cherry variety for loose harvesting. Fruits of good quality with notable flavour. Intense red colour and pleasant taste.

Cocktail

Rugose Defense™

Rexoso RZ

Cocktail

Premium cocktail variety “buy me” appearance.

Alongside HR resistance to ToBRFV Rexoso also brings a wonderful taste where the sweetness and acidity of the fruit is perfectly balanced. The higher levels of acidity in the fruit make this tomato a real premium offering in the cocktail segment. With a yield potential on par with the standard commodity varieties in segment it is clear to see that Rexoso will be popular with consumers and producers alike. The deep red external colour continues right to the core of the the round fruit giving a nice “buy me” appearance.

Cocktail

Rugose Defense™

Vivalto RZ

Cocktail

The Mediterranean cocktail tomato.

Nice deep red colour with a good and uniform fruit size during the whole cycle. The truss shape is also very nice and uniform. It has an excellent shelflife. The plant has a good vigor and is adapted to long cycles in Autumn/Winter conditions, but also to Spring/ Summer cycles.

Marmande

Rugose Defense™

Monfury RZ

Marmande

Ribbed Red Tomato with High Resistance to Rugose.

Ribbed tomato. Average fruit size between 100-150 grams. No tendency to split and with an excellent flavour.

Plum

Rugose Defense™

Alginet RZ

Plum

Plum tomato with High Resistance to Rugose.

Plum tomato with an excellent deep red colour and skin quality. Maintains calibre and shape throughout the cycle. Small pedunculated stalk. Good retail life ideal for export.

Premium Cherry-Truss

Rugose Defense™

Hateno RZ

Premium Cherry-Truss

Everything that is required in a premium Cherry TOV.

Hateno is everything that is required in a premium Cherry TOV. It produces attractive trusses of bright red fruit with a fantastic flavour profile that has been independently verified as equal or better than the current standards. The yield potential of Hateno has pleasantly surprised us in our trials as it has outyielded all comparable varieties. The shelf life is perfect for the supply chain so the product will make it to the consumer in perfect condition.

Premium Cherry-Truss

Rugose Defense™

Hyrule RZ

Premium Cherry-Truss

Impressive combination of yield and flavour. TOV cherry with high resistance to ToBRFV. Offers an outstanding combination of productivity and excellent flavour profile. The plant is slightly vegetative, very uniform, with perfect, uniform and attractive trusses. Fruits are firm and crunchy with high Brix. Trusses are not prone to breaking, resulting in high marketable yield and good shelf life. Also suitable for loose harvesting.

Premium Cherry-Truss

Rugose Defense™

Magiquia RZ

Premium Cherry-Truss

Premium Cherry-Truss tomato with High Resistance to Rugose.

Cherry-Truss on the vine tomato. Deep red fruit with an excellent flavour (high Brix value).

Premium Cherry-Truss

Rugose Defense™

Proventura RZ

Premium Cherry-Truss

Great taste and greenhouse performance in one variety.

Proventura brings high quality premium cherry with a plant perfectly suited to growing in high tech growing conditions. The taste profile has proven in many benchmarking tests to be a significant improvement on the market standards so a great consumer experience is guaranteed. The plant is naturally open and the generative habit means that it is easy to balance with low inputs. The vigour of the plant ensures that good production levels are reached.

Cherry-Truss

Rugose Defense™

Talavante RZ

Cherry-Truss

Cherry on the vine tomato variety for long cycles. Uniform trusses with fruits of very good red colour. Excellent flavour with high °Brix. Good shelf life.

Intermediate

Rugose Defense™

Aluwa RZ

Intermediate

Yield and Size.

Intermediate loose tomato. Average size 160–200 grams. Good colour and shelf life.

Round

Rugose Defense™

Durasol RZ

Round

On the vine or loose tomatoes with good skin quality.

On the vine tomato. Very good fruit colour, with excellent firmness and long retail life.

Round

Rugose Defense™

Fierasol RZ

Round

More kilograms in less time.

Compact plant variety with long trusses for short autumn or spring cycles.
Good fruit firmness.

Round

Rugose Defense™

Ricosol RZ

Round

Quality and colour.

On the vine tomato. Very good fruit colour with excellent firmness and long retail life.

 RIJK ZWAAN

The solution to Rugose is High Resistance

Definition of terms describing the reaction of plants to abiotic pests, diseases and stress for the horticultural seed industry (approved by the ISF Horticultural and Ornamental Section in May 2005) : See www.rijkwaaan.es y en www.worldseed.org.

Indications: all these indications are the result of repeated tests both at our experiment centres and with farmers themselves, and may differ from the above depending on the climate zones and conditions, or if the right cultural practices are not observed. Rijk Zwaan has carefully written the text in this brochure. However, as it is a general guide, parameters such as the specific climate conditions of each area should be taken into account in its application. The images used are intended to provide a general idea of the product type, but this may differ depending on the farming techniques, management and cultural practices applied to the product. None of the indications expressed on individual data sheets will be valid without taking these general considerations into account. Therefore, in no case is Rijk Zwaan responsible for the results which derive from its implementation, as this process includes many factors external to the brochure content, such as the aforementioned climate conditions or the different agricultural techniques of each farmer. In any case, if the user has any doubts about the influence of local conditions on the development of a variety, Rijk Zwaan recommends carrying out a small-scale trial production. Reproduction and total or partial modification in any form or system is prohibited, without the explicit written consent of Rijk Zwaan Ibérica S.A.
