

Lettuce assortment

Its healthy characteristics make lettuce popular among consumers all over the world. From butterhead to iceberg and from oakleaf to Salanova, Rijk Zwaan has always led the way in lettuce. And we are continuing to add new, innovative types and varieties all the time. As the biggest player in lettuce, our company offers an extremely diverse lettuce range in terms of shape, colour and flavour. Our breeding work further increases the diversity, enabling us to meet customers' needs with specific varieties for every production region and every season. Growers can depend on our lettuce varieties to deliver a good yield, shelf life, colour and texture with minimal problems from bolting or tipburn. Thanks to our extensive experience, we are quick to act whenever new strains of downy mildew are discovered.

Variety name		Resistances		Product description				USPs				Growing period / climate conditions						
Babyleaf																		
NCT	Alboreto RZ	HR	Bl:16-36EU/Nr:0	Attractive glossy red batavia lettuce A fast-growing, high-yielding batavia lettuce with an attractive appearance thanks to narrow and reasonably thick red baby leaves. Has a very upright growing habit and produces a uniform crop.				<ul style="list-style-type: none">• Attractive red colour• Narrow leaf and stem• Fast-growing variety				S	S	S	S			
NCT	Bourdais RZ	HR	Bl:16-36EU/Nr:0	Fast grower An attractive oakleaf lettuce with dark red, small serrated leaves and a nice narrow stem. Well-shaped baby leaves produce high volume, perfect for packaging. Vigorous with good field standability.				<ul style="list-style-type: none">• Vigorous crop• Dark red colour• Good leaf shape				S	S	S	S			
NCT	Chapman RZ	HR	Bl:16-36EU/Nr:0	Dark green and deeply incised leaves A small incised-leaf type lettuce that produces dark green, deeply incised leaves. In addition to its good presentation, it is a strong-growing variety with good field standability.				<ul style="list-style-type: none">• Dark green colour• Deeply incised leaves• Good field standability				S	S	S	S			
NCT	Coulthard RZ	HR	Bl:16-36EU/Nr:0	Bright green batavia lettuce Produces very bright green leaves with a thick texture. Due to its medium to fast growth, most suited to spring, summer and autumn growing conditions. During these periods it exhibits excellent field standability and is slow to bolt in summer.				<ul style="list-style-type: none">• Bright green colour• Good field standability				S	S	S	S			
NCT	Daywalt RZ	HR	Bl:16-36EU/Nr:0	Very upright cos with narrow pointed leaves A dark green baby-leaf cos lettuce with an attractive glossy appearance. Its narrow, pointed leaves are thick and sturdy and have a long shelf life. Due to its pointed shape and very upright growing habit, it can be left on the field for longer periods. Produces high yields.				<ul style="list-style-type: none">• Pointed leaves• Upright growing habit• Good field standability				S	S	S	S			
NCT	Lidivia RZ	HR	Bl:16-36EU/Nr:0	Reliable and intense red lollo rossa A triple-red lollo rossa with a thin stem. Its intense red colour and good leaf structure give this baby leaf lettuce a very attractive appearance. Quite fast growing and is suitable for year-round production. Due to its wide package of Bremia resistances, this variety is very reliable.				<ul style="list-style-type: none">• Triple-red type• Year-round production• Wide resistance package				S	S	S	S			
NCT	Ligier RZ	HR	Bl:16-36EU/Nr:0	Dark red incised leaf lettuce A dark red incised leaf lettuce for baby leaf production. The deeply incised leaves are firm and resemble oak leaves when harvested.				<ul style="list-style-type: none">• Dark red• Firm structure• Deeply incised leaves				S	S	S	S			
NCT	Solavia RZ	HR	Bl:16-36EU/Nr:0	Intense red oakleaf lettuce A triple-red oakleaf lettuce with intense red leaves that are very smooth with round lobes. A vigorous variety that can be used for year-round production.				<ul style="list-style-type: none">• Intense red• Round lobes• Vigorous				S	S	S	S			
NCT	Tambay RZ	HR	Bl:16-36EU/Nr:0	Robust incised baby leaves for better processing A dark green incised leaf lettuce and a great addition to the baby leaf range. Leaves are bright green and have a strong three-dimensional structure. Incisions are high up the leaves so it remains firm during processing. Very strong against bolting so can be grown in all periods.				<ul style="list-style-type: none">• Three-dimensional leaf shape• Good incising• Slow to bolt• Year-round production				S	S	S	S			
NCT	Valdivia RZ	HR	Bl:16-36EU/Nr:0	Reliable and shiny baby cos A dark green cos lettuce for baby leaf production. The small, narrow leaves have a glossy shine giving them an attractive appearance. This variety has firm, upright growth which, along with its wide package of resistances, produces a healthy plant. A very reliable variety.				<ul style="list-style-type: none">• Glossy leaves• Erect growth• Wide resistance package				S	S	S	S			
NCT	Webber RZ	HR IR	Bl:16-36EU/Nr:0 LMV:1	High-volume oak type baby leaf An outstanding green oakleaf lettuce. The baby leaves are narrow and glossy and have a very good texture. Moreover, the thickness and three-dimensional structure of the leaves produce a high volume when packaged. Grows upright, enabling fast harvesting.				<ul style="list-style-type: none">• Three-dimensional leaf shape• Good leaf thickness• Good field standability				S	S	S				
NCT	Zanardi RZ	HR	Bl:16-36EU/Nr:0	Healthy red baby cos with good field standability A red cos lettuce with oval to round shiny leaves, homogeneously coloured without spots. Its narrow cut point helps to maintain quality and reduce browning on the surfaces, even when more mature. This cos baby-leaf variety produces a good, healthy yield.				<ul style="list-style-type: none">• Erect growth• Remains within leaf specification for longer• Narrow cut point				S	S	S	S
